

IQ Battery LED status meaning?

After commissioning (normal operation)

Led State	Description
Rapidly flashing Yellow	Starting up/ Establishing communications
Red flashes in sequences of 2	Error
Solid yellow	Not operating due to high tempertaure
Solid blue or green	Idle. Color transition from blue to green as state of charge increases. You can check Enphase for charge status.
Slowly flashing blue	Discharging
Slowly flashing green	Charging
Slowly flashing yellow	Sleep mode activated
Off	Not operating

*IQ Batteries have one-hour orphan timer. If the IQ Gateway stops communicating with them, after one hour the IQ Batteries return to an 'uncommissioned state'.
